

CHRISTIAN FAITH & SCIENCE: *Friends or Foes?*

a lecture by

DR. WALTER BRADLEY, Ph.D., P.E.

Distinguished Professor of Engineering
Author, *The Mystery of Life's Origin*

ABSTRACT:

It is widely believed that Christian faith and modern science are necessarily adversarial, with evidences presented ranging from Galileo's conflict with the Catholic Church in the 16th century to the spate of recent books by atheists (e.g., Richard Dawkins' *The God Delusion*) touting scientific support for atheism.

This presentation will explore whether the discoveries of modern science have made belief in God more or less plausible and whether the thesis made popular by historian Andrew Dickson White, President of Columbia University, in his book *A History of the Warfare of Science with Theology in Christendom* is actually historical after all.
